

The Law Council of Australia

The People, the Profession and the Institutions

This new book is more than a survey of the Law Council's history and operations.

The book proceeds on the premise that knowledge of Australia's legislative and judicial structures is essential to understanding the legal profession's peak body, and its interactions. The helpful review of our legal institutions meets an obvious need, too long neglected.

Equally, leading individuals in the legal profession, legal education and the judiciary are fundamental to the Australian legal scene. From Colonial times to the 21st century, the careers of hundreds of influential lawyers are traced in this liberally illustrated book.

The book is an organisational record too, tracing the evolution of the Law Council and its constituent bodies and following firms and professional groupings throughout Australia, from their beginnings to the present day.

For easy reference, the rich array of accurate detail is in rational subject order, followed by appendices and an index.
